

AT&T Phone Line Access

Please be aware if you need AT&T phone service, the AT&T technician must access phone lines in the 1st floor storage area on your side of the building. The same key you have that opens your storage room where your storage cage is opens all storage rooms including those on the 1st floor. You are responsible for letting AT&T in that 1st floor storage room to do work for you.

Please do not call the Board or Property Management to open storage room doors. You have the key.

Thank you for your cooperation.
