

DO NOT TOUCH

Horn devices located in both bedrooms near your AC vent are required by code to assist with hearing the building fire alarm if sleeping on in the shower. These are association property attached to the main fire alarm system outside on the catwalks and only sound if someone pulls fire alarm outside.

Please **DO NOT TOUCH** or attempt to move them under any circumstances. Repair/replacement from tampering can cost over \$1,000 and will be charged to the unit owner. Should you notice any problem, please call the Property Manager.

PLEASE NOTE: These have no connection to smoke detectors inside units which are unit owner property.

Thank you.
